

## ISO Card

| Product Description                                | ISO Card                 |
|--|--------------------------|
| <b>Electrical Characteristics</b>                  |                          |
| Operating Frequency                                | 125KHz / 13,56MHz        |
| IC Technologies                                    | NXP, EM MARIN, ATMEL     |
| Memory Size  | Depends on IC type       |
| Magnetic Stripe                                    | HiCo / LoCo (on request) |
| <b>Thermal &amp; Environmental Characteristics</b> |                          |
| Storage Temperature                                | -25°C up to +60°C        |
| Operating Temperature                              | -25°C up to +55°C        |
| RoHs Compliance                                    | YES                      |
| <b>Physical Characteristics</b>                    |                          |
| Length   | 85,6 mm (ISO 7810)       |
| Width  | 53,98 mm (ISO 7810)      |
| Thickness  | 0,78 mm (ISO 7810)       |
| Weight   | 6,0 gr                   |
| Material   | PVC, PC, PET & PET-G     |
| <b>Article no:</b>                                 |                          |
| Article no:  | IC001                    |
| <b>Typical Applications</b>                        |                          |
| Medical Equipment                                  |                          |
| Endoscopy  |                          |
| Acces Control, Security & Payment                  |                          |
